FOR ALL**

# STANDARD EQUIPMENT

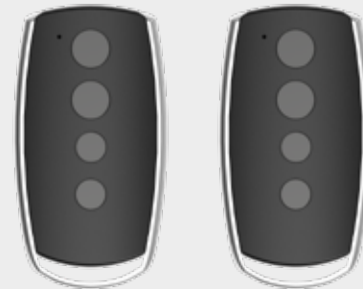

A Select-Line series garage door is supplied standard with an operator, two hand-held openers and a wireless wall switch. This allows you to simply open and close your garage door, from close by and further away.

There are two models of operator: Select-Line 8 (1000N) and Select-Line 12 (1200N). The Select-Line 12 was designed specifically to operate larger garage doors.

**Operator (1x)**

**Remote transmitter (2x)**

**Wireless wall switch (1x)**

## TRACK SYSTEM

A Select-Line garage door is fitted with the TS100 track system. This system features extension springs concealed in the vertical tracks, making it extra safe during operation. Thanks to the springs being pre-tensioned, the TS100 track system can be very quickly installed.

The TS100 is supplied standard with a 60 mm black lintel profile as top closure and two suspension profiles to attach the horizontal tracks to the ceiling.

100 mm free head room required

Pre-tensioned extension springs

Ball bearing rollers

Smart connection curve connections

Flexible bolt-nut connections

Industrial strength hinges

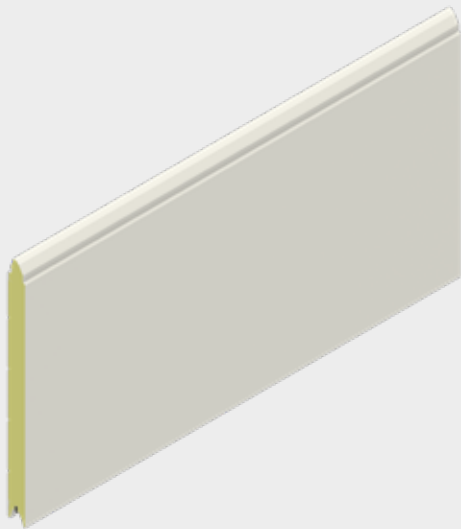

4D seal  
The track system is covered out of sight on the outside

# TOP QUALITY

The Select-Line garage door offers top quality for a keen price. Only the best quality materials have been used, to meet your expectation of a long-lasting and safely operating garage door.

## 40 mm insulated panels

For optimum insulation of your garage.

## TS100 tension spring system

For quiet operation of your garage door, thanks to the Silent Springs. The springs are concealed in the vertical tracks, making the system extremely safe to operate.

## Ball bearing rollers

For silent opening and closure of your garage door, gone are the days of squeaks and creaks!
